

PRIME

TG STRETCH

Introducing *PRIME*

PRIME, TG's affordable performance film, was designed with the masses in mind. It's optimum pre-stretch range makes it easy to work well with your standard wrapping machines and is able to achieve good load stability with the right wrapping method!

→ **Suitable for medium-speed wrapping machine**

→ **Optimum working pre-stretch range at 200% to 300%**

→ **Works well with uniform-shaped load**

→ **Good puncture and tear resistance**

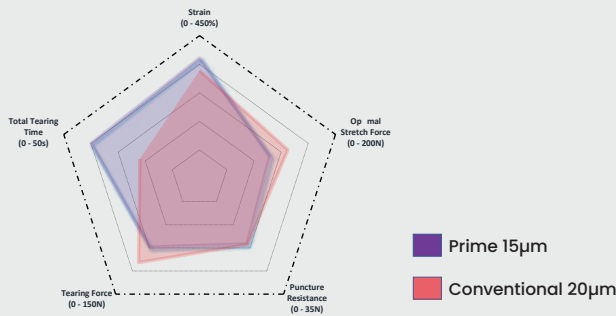

→ **Economical with excellent performance**

Fit on Most WRAPPING MACHINE

Prime 15µm VS Conventional 20µm

FILM CONSUMPTION PER PALLET

Pallet size: 1130 (L) x 1130 (W) x 1180mm (H)

Thickness available from 17µm, 20µm and 23µm

Width in 500mm

Roll comes in 15kg net weight

Stretch Film Comparison Guide

Film Type	Key Features	Strength Level	Thickness	Ideal Application	Main Benefit
PRIME	Standard, general-purpose stretch film	Medium	Standard	Manual wrapping, daily warehouse use	Cost-effective and easy to use
Next	Advanced downgauged film, thinner yet strong	High	Thinner	Medium loads, sustainability-focused operations	Material reduction with reliable performance
Velocity	High-performance stretch film designed for speed and stability	Very High	Optimised	Automated & high-speed wrapping, heavy or unstable loads	Maximum load security with reduced film usage
